

Technical Appendix 1.3: Information Required in an Environmental Statement

Technical Appendix 1.3: Information Required in an Environmental Statement and Location in ES¹

Information Required in an Environmental Statement (Regulation 18 (3) of EIA Regulations)		
Required Information		Chapter/Section of ES
a	A description of the proposed development comprising information on the site, design, size and other relevant features of the development.	ES Volume 1, Chapter 1: Introduction ES Volume 1, Chapter 4: Proposed Development Description
b	A description of the likely significant effects of the proposed development on the environment.	ES Volume 1, Chapters 6-19 and ES Volume 2
c	A description of any features of the proposed development, or measures envisaged in order to avoid, prevent or reduce and, if possible, offset likely significant adverse effects on the environment.	ES Volume 1, Chapters 6-19 and ES Volume 2
d	A description of the reasonable alternatives studied by the developer, which are relevant to the proposed development and its specific characteristics, and an indication of the main reasons for the option chosen, taking into account the effects of the development on the environment.	ES Volume 1, Chapter 3: Alternatives and Design Evolution
e	A non-technical summary of the information referred to in sub-paragraphs (a) to (d).	Non-Technical Summary
f	Any additional information specified in Schedule 4 relevant to the specific characteristics of the particular development or type of development and to the environmental features likely to be significantly affected.	Refer to subsequent table within this Technical Appendix 1.3
Information Required in an Environmental Statement (Regulation 18 (4) of EIA Regulations)		
Required Information		Chapter/Section of ES
a	Where a scoping opinion or direction has been issued in accordance with regulation 15 or 16, be based on the most recent scoping opinion or direction issued (so far as the proposed development remains materially the same as the proposed development which was subject to that opinion or direction).	Technical Appendix 2.3 and Technical Appendix 2.4
b	Include the information reasonably required for reaching a reasoned conclusion on the significant effects of the development on the environment, taking into account current knowledge and methods of assessment.	ES Volume 1, Chapters 6-19 and ES Volume 2
c	Be prepared, taking into account the results of any relevant UK environmental assessment, which are reasonably available to the person preparing the environmental statement, with a view to avoiding duplication of assessment.	ES Volume 1, Chapters 6-21 and ES Volume 2

Information Required in an Environmental Statement (Schedule 4 of EIA Regulations)		
Required Information		Chapter/Section of ES
1	A description of the development, including in particular: - a description of the location of the proposed development; - a description of the physical characteristics of the proposed development, including, where relevant, requisite demolition works, and the land-use requirements during the operation stage; - a description of the main characteristics of the operational phase of the proposed development (in particular any production process), for instance, energy demand and energy used, nature and quantity of the materials and natural resources (including water, land, soil and biodiversity) used;	ES Volume 1, Chapter 1: Introduction ES Volume 1, Chapter 4: Proposed Development Description ES Volume 1, Chapter 5: Demolition and Construction

Information Required in an Environmental Statement (Schedule 4 of EIA Regulations)		
Required Information		Chapter/Section of ES
	an estimate, by type and quantity, of expected residues and emissions (such as water, air, soil and subsoil pollution, noise, vibration, light, heat, radiation and quantities and types of waste produced during the operation stage.	ES Volume 1, Chapters 6-19 ES Volume 2
2	A description of the reasonable alternatives (for example in terms of development design, technology, location, size and scale) studied by the Applicant, which are relevant to the proposed development and its specific characteristics, and an indication of the main reasons for selecting the chosen option, including a comparison of the environmental effects.	ES Volume 1, Chapter 3: Alternatives and Design Evolution
3	A description of the relevant aspects of the current state of the environment (baseline scenario) and an outline of the likely evolution thereof without implementation of the proposed development as far as natural changes from the baseline scenario can be assessed with reasonable effort on the basis of the availability of environmental information and scientific knowledge.	ES Volume 1, Chapter 3: Alternatives and Design Evolution
4	A description of the factors specified in Regulation 4(2) likely to be significantly affected by the proposed development: population, human health, biodiversity (for example fauna and flora), land (for example land take), soil (for example organic matter, erosion, compaction, sealing), water (for example hydromorphological changes, quantity and quality), air, climate (for example greenhouse gas emissions, impacts relevant to adaptation), material assets, cultural heritage, including architectural and archaeological aspects, and landscape.	ES Volume 1, Chapters 6-19 and ES Volume 2.
5	A description of the likely significant effects of the proposed development on the environment resulting from, <i>inter alia</i>: - the construction and existence of the development including, where relevant, demolition works; - the use of natural resources, in particular land, soil, water and biodiversity, considering as far as possible the sustainable availability of these resources; - the emission of pollutants, noise, vibration, light, heat and radiation, the creation of nuisances, and the disposal and recovery of waste; - the risks to human health, cultural heritage or the environment (for example due to accidents or disasters); - the cumulation of effects with other existing and/or approved projects, taking into account any existing environmental problems relating to areas of particular environmental importance likely to be affected or the use of natural resources; - the impact of the project on climate (for example the nature and magnitude of greenhouse gas emissions) and the vulnerability of the project to climate change; and - the technologies and the substances used. The description of the likely significant effects on the factors specified in Regulation 4(2) should cover the direct effects and any indirect, secondary, cumulative, transboundary, short-term, medium-term and long-term, permanent and temporary, positive and negative effects of the development. The description should take into account the environmental protection objectives established at Union or Member State level which are relevant to the proposed development, including in particular those established under Council Directive 92/43/EEC and Directive 2009/147/EC.	ES Volume 1, Chapters 4-21 and ES Volume 2

¹ Materially consistent with Schedule 3 of the Marine Works (EIA) Regulations 2017 (as amended).

Information Required in an Environmental Statement (Schedule 4 of EIA Regulations)		
Required Information		Chapter/Section of ES
6	A description of the forecasting methods or evidence, used to identify and assess the significant effects on the environment, including details of difficulties (for example technical deficiencies or lack of knowledge) encountered compiling the required information and the main uncertainties involved.	ES Volume 1, Chapters 6-19 and ES Volume 2
7	A description of the measures envisaged to avoid, prevent, reduce or, if possible, offset any identified significant adverse effects on the environment and, where appropriate, of any proposed monitoring arrangements (for example the preparation of a post-project analysis). The description should explain the extent to which significant adverse effects on the environment are avoided, prevented, reduced or offset, and should cover both the construction and operational phases.	ES Volume 1, Chapter 5: Demolition and Construction Mitigation sections of ES Chapters 6-19, and ES Volume 2
8	A description of the expected significant adverse effects of the development on the environment deriving from the vulnerability of the development to risks of major accidents and/or disasters which are relevant to the project concerned. Relevant information available and obtained through risk assessments pursuant to EU legislation such as Directive 2012/18/EU of the European Parliament and of the Council or Council Directive 2009/71/Euratom or UK environmental assessments may be used for this purpose provided that the requirements of this Directive are met. Where appropriate, this description should include measures envisaged to prevent or mitigate the significant adverse effects of such events on the environment and details of the preparedness for and proposed response to such emergencies.	ES Volume 1, Chapters 6-19, and ES Volume 2
9	A non-technical summary of the information provided under 1 to 8 above.	Non-Technical Summary
10	A reference list detailing the sources used for the descriptions and assessments included in the ES.	ES Volume 1, Chapters 1-19 and ES Volume 2
