<p><b>Reference</b> MLA/2015/00088/R4</p> <p><b>Status</b> Discharged</p>		<p><b>Deadline</b> prior to dredging in the fourth and subsequently the seventh and tenth year of this licence.</p> <p><b>Last Received</b> 24-APR-2019 15:20</p> <p><b>Discharged</b> 14-NOV-2019 14:04</p>	<p><b>Name</b> Condition</p> <p><b>Description</b> A regime of future sediment sampling is undertaken by PD Teesport, of at least three yearly intervals, which must be agreed in advance with the MMO. It was agreed with MMO that the data in 'Carcinus – 20126278 – MMO Results' would support both the marine licence application for the Hartlepool channel project and the mid-sampling licence condition on MLA/2015/00088 (as the dredge area for the Hartlepool channel project overlapped with part of the maintenance area on MLA/2015/00088). The same principle has been applied to the Northern Gateway Container Terminal project (as part of the dredge area for the Northern Gateway Container Project overlaps with the maintenance area on MLA/2015/00088 in the Tees estuary) – the results provided in 'MMO_Results_Template MAR00179 V3' are the samples that MMO requested from the Tees estuary to inform MLA/2015/00088.</p>
