MMO Licence Application

Variation Request 7 ACCEPTED

Request Date

14-SEP-2020

Requested By

Josh Murphy

Licence(s) to be varied

L/2017/00012/5 (Marine Licence)

What would you like to vary about your current licence(s)/response(s)?**Activity 1.1 – Licensed Activity**

Activity to be updated to include an additional 30,000 tonnes of clay to be removed from the holding basin. It should be noted that the Holding Basin and Quays 10&11 are recognised under the same activity, therefore, only the additional quantities are to be revised.

Schedule 5 – Dredge Location Scheduled Document

Please find attached an updated plan (ASC-001-00009 Rev G) of dredge locations to include the area as noted in this application. This drawing shall replace the existing plan found in the Licence schedule. As the plan shows, Quay 10 now includes an area of the holding basin, which is to be dredged to -13.5mCD. The location is shown from points 13-16.

Schedule 4 – Dredge Quantity Scheduled Document

Please find attached an updated dredge quantity table, to include the additional material to be removed. An additional 30,000 tonnes of clay will be removed from the holding basin during a capital dredge.

Why would you like to vary your licence(s)/response(s) in this way?

An application to vary the existing marine license L/2017/00012/4 is being submitted; to allow the licence holder to deepen an area within the holding basin, from -9.5 mCD to -13.5 mCD. This would essentially result in a section of the Holding Basin becoming part of Quay 10. To do this it is proposed that an additional 30,000 tonnes of virgin material is to be removed, by undertaking one capital dredging campaign in November 2020.

Please see attached cover letter.

What date would the varied licence(s)/response(s) come into effect?

28-SEP-2020

Closed Date

29-OCT-2020
