Anthony,

We have reviewed the estimated maximum dig depth plan (10035117-AUK-XX-XX-DR-ZZ-0075-04-Prairie\_Rem\_Ex) produced in support of the Prairie Enabling Works being conducted under Planning Approval R\_2020\_0318\_FFM.

The review has been completed as observations at the site have indicated that to remove some man-made structures excavation below that shown in issue 04 of the plan will be required.

The estimated maximum dig depths have been adjusted to take account of these observations in the updated plan (10035117-AUK-XX-XX-DR-ZZ-0075-05-Prairie\_Rem\_Ex). Arcadis consider the adjustments to dig depths in the updated plan do not alter the assessment or conclusions reached in the below documentation submitted in discharge of Condition 5 of R\_2020\_0318\_FFM.
