Conduct of operations proximate to the Central Area Transmission System (“CATS”) terminal and CATS pipelines

Good Afternoon,

Your above mentioned enquiry has issued a notification to us, in our capacity as operator of the CATS terminal and the CATS pipelines, that you have planned works within our area of interest. Any works or activity that have the potential to change the characteristics of the CATS pipeline corridor or present an immediate or latent threat to the CATS pipelines structural integrity within 50m of the CATS pipelines must be reviewed and assessed for safe working practices. On receipt of your information we will either confirm that there is no risk of such works infringing our CATS pipelines wayleaves or require to more generally assess the potential risk of such works to our operation. In the event that your works are within our area of interest but we consider that such works will not affect the CATS pipelines, we will grant you an “Authorisation to Work” form for your activity. Please see the attached blank example of CATS “third party works application” form CAT-PPI-FRM-001. We would appreciate if you would send the information required to complete this form in full.

The CATS pipelines have been built according to, and are managed subject to, the Health and Safety at Work Act (1974) and the associated Regulations including The Pipelines Safety Regulations 1996 (PSR) and The Pressure Systems Safety Regulations 2000 (PSSR). The operator of the CATS terminal and the CATS pipelines is a member of UKOPA, LSBUD and Linesearch. For more information on the associated businesses and pipelines please the links provided below.

I would appreciate a response even if you decide to cancel this project, so it can be closed out in our database.
