**Subject:** Consultation Response to Planning Application: R/2021/0676/FF

Dear Mr Pedlow,

We have been advised that a planning application (Ref: R/2021/0676/FF) has been submitted for development works, expressed to be an excavation, in the access road below pipe bridge Bravo 10. The plan on the RCBC Planning application site is not clear but we assume it is the access road below the pipe bridge as shown on the attached google earth attachment.

Please note:

- MGT did not receive details of the planning application though it occupies a neighbouring property;
- MGT uses the access road that is to be excavated. It is not clear in the application what alternative access will be afforded along the access road during the period of the development works and thereafter;
- Services that support the MGT plant run over the pipe rack and so any later works on the pipe bridge may impact MGT's operations. MGT is a 299 MWe baseload power plant and so operations run 24/7.

Kind regards

Anju Sanehi
